EDUCATION

Princeton University (MSE) **August 2023 – December 2025**
3.91 GPA *Princeton, NJ*
- Master of Science and Engineering in Computer Science.
- Recipient of full tuition teaching scholarship.

Olin College of Engineering (BS) **August 2019 – May 2023**
3.96 GPA *Needham, MA*
- Bachelor of Science in Electrical and Computer Engineering.
- Recipient of half tuition merit scholarship.

EXPERIENCE

McMaster-Carr **January 2026 – Present**
Operations + Project Management *Robbinsville, NJ*
- Operationalizing LLM-driven quality initiatives through algorithm development and model fine-tuning.
- Leading direct reports to exceed company quality standards while fostering a high-performing team environment.
- Developing AI-powered tools that streamline supervisory workflows and improve operational efficiency.

Black Planning Project **November 2024 - Present**
Board Member *Remote*
- Specializing in technology, finance, and sustainability initiatives to empower minority and working-class communities.
- Aiding strategic consulting projects centered on equitable and sustainable urban planning in the Toronto and NYC metro areas.
- Creating data-driven resources for politicians to better craft policies that directly address the needs of their constituents.

Coinbase Global, Inc. **May 2022 - September 2023**
Coinbase Wallet Software Engineer. *Remote*
- Contributing to the development of user-friendly tools with the intention of optimizing Coinbase Wallet.
- Building intuitive and comprehensive interfaces to help manage user investment activity and history.
- Utilizing Solidity, Golang, and Ruby to build both on-chain and off-chain financial solutions.

PROJECTS

Thistle (thistle.earth) **August 2026 – Present**
- Open-source local LLM platform for React Native Flutter for app builders to integrate inference more cheaply and sustainably.
- Positioned as the basis for a research project to explore the tradeoffs of local inference.

Partial (partial.live) **February 2026 – Present**
- A cross-platform app that enables users to create interactive mobile widgets through natural-language prompts.
- Developed a custom scripting language and compilation pipeline for native cross-platform animated widgets (patent pending).

Pantry (pantryapp.xyz) **October 2024 – March 2026**
- Princeton University-backed initiative centered on building a mobile app designed to restore user agency in social media.
- The privacy-conscious app allows users to explicitly define their algorithmic feeds while maintaining 100% control of their data.

ACCOMPLISHMENTS

Fulbright Canada **January 2024 - August 2024**
Student Research Fellow. *Toronto, ON, Canada*
- Collaborated with NGOs to write a report on Canadian financed emissions.
- Built a people-powered, sustainability-focused, Bloomberg-terminal like platform help to democratize future research in the space.
- Presented work at international conventions, including the UN Principles for Responsible Investment conference.

SKILLS

Software: Python, JavaScript, TypeScript, C, Solidity, HTML/CSS, Ruby, C#, Java, GoLang, Kotlin, Swift, SQL, Assembly, Verilog.
Hardware: Complete PCB Development Process, Proficiency in Arduino and Raspberry-Pi.
Interpersonal: Project Management, Event Organization, Sustainability & Tech + Urban Planning Consulting
Foreign Languages: Proficient in Spanish (New York State Seal of Biliteracy) and Yoruba, Basic French, Some Chinese.
Miscellaneous: Photo and Video Editing, CAD Modeling, and Music Production.

SERVICE AND LEADERSHIP

HeadStart Fellowship **December 2021 – Present**
Founding Member. *Remote*
- Founding member of a professional development network supporting students from historically disadvantaged backgrounds.
- Scaled HeadStart to support hundreds of fellows in landing roles in tech, finance, consulting, and top graduate programs.

Princeton University Teaching Assistant **September 2023 - December 2025**
Teaching assistant for COS 109, COS 217, COS 333, COS 350. *Princeton, NJ*

National Society of Black Engineers **September 2019 - Present**
Programs/Events Lead and Outreach Program Coordinator. *Remote*

PAPERS

Seeing the Politics of Decentralized Social Media Protocols

CSCW · 2026

Oshinowo, Hwang, Zhang, Monroy-Hernández. Link

- Analyzes ActivityPub, AT Protocol, Nostr, and Farcaster as socio-technical systems encoding political values.
- Develops a conceptual framework for understanding power, governance, and control in decentralized infrastructures.
- Provides additional insights regarding the embedded politics of within the different approaches at "decentralization".

Pantry: Reconceptualizing Social Media Feed Curation and Its Implications for User Agency

Masters Thesis · 2026

Oshinowo, Monroy-Hernández. Link

- Systems and HCI research paper proposing user-authored social media feeds as an alternative to engagement-optimized ranking.
- Introduces Pantry, a mobile app enabling explicit, in-the-moment feed preference expression.
- Evaluated via surveys, activity logs, and debrief interviews, revealing strong user interest in agency-centered feed control.

CDCL Buddy: Demystifying SAT Solvers for Education

Princeton University · 2024

Oshinowo. Link

- Introduces an interactive visualization tool for Conflict-Driven Clause Learning (CDCL) SAT solvers.
- Bridges theory and practice through real-time exploration of conflict analysis and clause learning.
- Includes an informal usability study across learners with varying solver familiarity.

Fostering Social Connectivity by Digitizing the "Third Place"

Princeton University · 2023

Oshinowo. Link

- Explores how virtual platforms can recreate social functions of physical third places.
- Introduces Avable, a group-based video platform using multidimensional user matching.
- Emphasizes privacy-aware design, adaptability, and meaningful social connection.

How Do College Students Use ChatGPT to Learn to Code

Princeton University · 2023

Zhang, Alicki, Zheng, Oshinowo. Link

- Study of 108 students across 12 institutions examining ChatGPT use in programming education.
- Finds beginners rely heavily on AI assistance, while experienced programmers critically evaluate outputs.
- Provides guidance for responsible integration of AI tools into CS curricula.
